

# GP Bullhound Simplifies Compliance with Egnyte

Egnyte couldn't be simpler to deploy. We just turned it on. There was no intricate set up, no need to purchase Professional Services to enable Egnyte.

—Dave Nish | Vice President of Technology

**Egnyte provides GP Bullhound with better control over their data, and enables them to maintain compliance with GDPR and other regulations.**

## Alerting is a Time Saver

GP Bullhound values the visibility into external sharing and unusual behaviour. Egnyte is always on, monitoring across their geographies, and alerting them when an employee does something out of their normal profile so that they can investigate further. The team appreciates not having to log into the solution every day to determine what needs follow up, knowing that Egnyte will alert them to high severity issues, like unusually large downloads or deletions, or external sharing involving sensitive data.

### COMPANY

GP Bullhound, a boutique investment banking firm with offices across 8 countries, must comply with multiple, far-reaching regulations, including GDPR and FINRA. The firm needed a solution to provide visibility and an audit trail for their 24/7 operations.

### LOCATION

London, United Kingdom

### INDUSTRY

Investment Banking

### REGULATORY REQUIREMENTS

- GDPR
- FINRA

Ignorance is bliss, but once you've seen something you can't unsee it. We like the visibility into the 'known unknowns' to quote Donald Rumsfeld.

—Dave Nish | Vice President of Technology

DSAR response could cause a lot of headaches. But the DSAR workflows in Egnyte reduce a lot of manual work and help ensure that we meet GDPR notification deadlines.

—Dave Nish | Vice President of Technology

## Permissions Reporting has Simplified Compliance

The GP Bullhound team didn't expect to use the permissions browser as extensively as they do. They use it quarterly to audit permissions throughout the company to ensure compliance with FINRA, among other regulations. The easy-to-use browser allows them to keep on top of permissions housekeeping and keep their access control in good order.

Egnyte provides GP Bullhound with better control over their data, enables them to maintain compliance with GDPR and other regulations, and delivers peace of mind.

## EGNYTE

In a content critical age, Egnyte fuels business growth by enabling content-rich business processes, while also providing organizations with visibility and control over their content assets. Egnyte's cloud-native content services platform leverages the industry's leading content intelligence engine to deliver a simple, secure, and vendor-neutral foundation for managing enterprise content across business applications and storage repositories. More than 16,000 companies trust Egnyte to enhance employee productivity, automate data management, and reduce file-sharing cost and complexity. Investors include Google Ventures, Kleiner Perkins, Caufield & Byers, and Goldman Sachs. For more information, visit [www.egnyte.com](http://www.egnyte.com)
